

Hello,

The week of June 5, the US 5 Guilford Bridge contractor will put the finishing touches (grading topsoil and seeding) along the shoulders of the I-91 Emergency Access ramp at milepost 5.75, south of Exit 1 in Brattleboro. There may be a short-term (one hour) closure of the interstate shoulder for this work. The contractor may also install the fence and gate at the ramp.

At the bridge site, the contractor will continue placing stone fill along the channel of Broad Brook and building a contractor access road on southeast quadrant of the bridge.

Motorists should watch for flaggers who will assist trucks driving in and out of the bridge construction site.

Please drive with care through the construction zone. It is illegal in Vermont to use any handheld portable electronic devices while driving. The law carries fines of up to \$200 with points assessed if the violation occurs in a work zone.

The presentation given at a public information meeting held on May 25 is posted on the website as well as detour maps for when the bridge is closed for 4-weeks beginning July 10. Check out the project website: <http://www.us5bridgeguilford.vtransprojects.vermont.gov/index.html>

Best regards,

Jill
